Subject Index

A
Adaptive II-R filters (Muneyasu), 453
Adaptive tracking control (Jui-Hong), 861
Air gap coupling (Elsherbeni), 201
Algorithm for blind equation (Essebbar), 339
Algorithm-independent burst-free adaptive (Khasawneh), 687
Analysis of fuzzy models (Chia-Ju), 513
Analysis of positive real transfer functions (Marquez), 245
Applications of stable distributed time series (Tsihrintzis), 467

B
Bi-spectrum estimation of EEG signals (Mämpel), 369
Blind channel estimation (Tugnait), 311
Blind system identification (Martin), 1
Bond graphs (Lamb), 23
Burst-free adaptive hybrid (Khasawneh), 687

C
Cascade-parallel adaptive IIR filters (Muneyasu), 453
Cellular phone applications (Kuo), 669
Coefficients in a diamond (Yen), 175
Colored noise (Tugnait), 311
Complex QARMA processes (Duvaut), 413
Complex-co-efficient polynomials (Yen), 175
Constrained optimization of pedestal positioning systems (Chi-Huang), 879
Constructing the precedence diagram (Liu), 991
Cubic graphs (Tsukui), 565
Cylindrical two conductor microstrip transmission line (Elsherbeni), 901

D
Decentralized control systems (Liu), 31
Discrete model reduction (Lucas), 57
Discrete multiple time-delay systems (Feng-Hsiag), 975
Discrete non-linear systems (Bouyekhf), 499
Discrete systems (De La Sen), 721
Discrete-time nonlinear analysis (Haddad), 849
Dislocated sensor/actuator positioning (Heng-Kwung), 789
Disturbance rejection (Szita), 747

E

EEG signals (Mämpel), 369
Energetic systems (Longoria), 539

F
Feedback control with nonquadratic criteria (Haddad), 849
Finite spectral data (Fragulis), 41
Fixed modes for decentralized control systems (Liu), 31
Flexible systems via sensor/actuator positioning (Heng Kwung), 789
Fluid thermal conductivity (Belkasim), 583
Fuzzy models (Chia-Ju), 513

G
Gaussian mixture densities (Bond), 647

H
H ∞ Control Problems (Qi), 85
Hands-free cellular phone applications (Kuo), 669
Heat capacity in laminar duct flow (Liu), 583
Higher order statistics (Leung), 349
Higher-order cummulants (Tugnait), 311
Hop-delay for policing in ATM networks (Lam), 803
Hydrodynamic fluid-structure interaction analysis (Han), 929

I
Impedance matching domain (Sun), 141
Inerative method (Hwang), 631
Infinite spectral data (Fragulis), 41
Input-output decoupling (Koumboulis), 593

L
L-lossless factorization (Sato), 225
Laminar duct-flow (Liu), 583
Limit-cycle resonant oscillators (Kaplan), 833
Linear continuous systems (Chien-Hua), 707
Linear SISO systems (Huang), 631
Linear systems with nonlinear uncertain structure (Koumboulis), 593
Linear time-invariant SISO systems (Ngwompo), 156
Locally optimum detectors (Bond), 647

M
Mass model for hydrodynamic fluid structure (Han), 929
Model matching controller design (Szita), 747
Multi-point PADÉ approximation (Lucas), 57
Multi-port energetic systems (Longoria), 539
Multi-rate sampling (De La Sen), 721

N
Neural network controller (Chia-Ju), 523
Nonlinear Gaussian white noise terms (Jumarie), 773
Nonlinear singularly perturbed systems (Shing-Tai), 947
Nonlinear systems using CMAC network (Jui-Horng), 861
Nonlinear time series (Rao), 425
Nonlinear uncertain structure (Koumboulis), 593 & 625
Nonstationary time series (Rao), 425

O
Optimal control of vibration suppression (Heng Kwung), 789
Optimal D-stable control (Feng-Hsiag), 975
Optimal reduction of linear SISO systems (Hwang), 631
Output feedback coupling for linear systems (Koumboulis), 693

P
Passive LC ladder networks (Sun), 141
PDES (Liu), 991
Pedestal positioning system (Chi-Huang), 879
Periodic robot joint trajectories (Simon), 659
Perturbations (Chien-Hua), 707
PID compensation for trajectory tracking (Chia-Ju), 523
Planar microstrip lines (Elsherbeni), 201
PMD into implicit system (Fragulis), 41
Pole placement in discrete systems (De La Sen), 721
Policing in ATM networks (Lam), 803
Positive linear systems (Farina), 893
Positive real control problem (Sato), 225
Processing of ∝stable distributed time series (Tsihrintzis), 467

Q
QARMA processes (Duvaut), 413

R
Real QARMA processes (Duvaut), 413
Real transfer functions (Marquez), 245
Reduced order modelling (Bouyekhf), 499
Reduction of linear SISO systems (Hwang), 631
Relaxation oscillators (Kaplan), 833
Resonanat oscillators (Kaplan), 833
Robot joint trajectories (Simon), 659
Robust Schur stability (Yen), 175
Robust stabilization for discrete-time systems (Haddad), 71
Robust stabilization of linear continuous systems (Chien-Hua), 707

S
Second, third and fourth order cummulants (Martin), 1
Second-order phase-locked loop (Hare), 191
Short algorithm (Lamb), 23
Single sampling (De La Sen), 721
Singular junctions in bond graphs (Lamb), 23
Spectral and wavelet analysis methods (Rao), 425
Stable distributed time systems (Tsihrintzis), 467
State delay and perturbations (Chien-Hua), 707
State transfer problem (Agashe), 15
Stochasitc neighbouring-optimal control (Jumarie), 773
Sub-optimal discrete model reduction (Lucas), 57
Subband adaptive noise canceler (Kuo), 669
Synchronization (Essebbar), 339
Synthesis positive real transfer function (Marquez), 245

T
Taylor expansions (Jumarie), 773
Third-order orthogonal frequency (Mämpel), 369
Time varying state delay (Chien-Hua), 404
Trajectory tracking of robotic manipulators (Chia-Ju), 523

Transfer function matrix (Fragulis), 41
Transformations of cubic graphs (Tsukui), 565
Trimmed mean estimation (Mämpel), 369
Truncated Dielectrics (Elsherbeni), 901
Two-time discrete nonlinear systems (Bouyekhf), 499

V
Vibration suppression in flexible systems (Heng-Kwung), 789
Voltera-like model (lm), 385

W
Wave scattering formalisms (Longoria), 539
Wavelet analysis methods (Rao), 925

Z
Zernike moments (Belkasim), 577
